Order picking starts with storage

Kardex Remstar presents the sort2ship sorting solution at LogiMAT 2014

Neuburg/Kammel, 12/05/2013. Kardex Remstar is demonstrating its intralogistic expertise at LogiMAT 2014 in Stuttgart (25-27 February). In keeping with the saying “Order picking starts with storage”, it will be all about compact storage and clever picking at stand 651 in hall 1.

Kardex Remstar supplies efficient and reliable storage and retrieval solutions for customers from virtually all industry sectors in line with the “goods-to-person” principle. The latest application, sort2ship, is the answer to the need for flexible solutions for buffering and sequencing shipping orders.

With sort2ship, the customer is able to group together order lines from various storage systems – including storage lifts, vertical carousels, and static shelving – in a time-saving and cost-efficient manner. Using conveying technology, the containers with the order lines are transported to the buffer storage location where they are temporarily stored in the smallest possible space. On demand, the containers can then be sorted according to customer-specific shipping options – for instance the order in which they are loaded, their time of delivery, or certain forwarding specifications – and retrieved for packaging or directly for shipping. Thus sort2ship enables distribution centers and e-commerce suppliers with several thousand order lines per day to increase their order picking activity by up to 35 percent. Besides e-commerce and mail-order businesses, sort2ship is also perfect for using in the area of food production.

In keeping with the saying “Order picking starts with storage,” Megamat RS vertical carousels and Shuttle XP storage lifts form the basis of order picking solutions from Kardex Remstar. With the Power Pick Global warehouse management software, storage strategies such as batch picking can be adopted and user-friendly features including pick-to-light and put-to-light can be integrated. The range of solutions at LogiMAT 2014 is rounded off by the various life cycle services offered by Kardex Remstar.

About Kardex Remstar

Kardex Remstar develops, manufactures, and maintains dynamic storage and retrieval systems. The company is a leading provider of storage lifts, vertical carousels, order picking software, and life cycle services. Customers from all industries use solutions from Kardex Remstar to organize their intralogistic processes in a simpler and more transparent manner as well as to save space and cut process costs. Kardex Remstar customers come from a broad range of industries, such as automotive, electronics, chemical/pharmaceutical, retailing, mechanical engineering, and health care.

Kardex Remstar has two production sites in Germany (Bellheim and Neuburg). To date, the company has successfully installed around 140,000 dynamic storage systems across the globe. With an extensive sales and dealership network, Kardex Remstar is active in over 30 countries and employs around 1,200 people worldwide.
