IPA in action

Make picking clearer, easier, and more consistent

Visual picking guidance for clearer, more accurate workstation performance.

Kardex Intuitive Picking Assistant brings projected visual guidance directly to the AutoStore workstation, helping operators identify the correct bin compartment and complete picks with more confidence. By keeping key information close to the work area and using real-time hand-detection feedback, IPA helps reduce wrong picks, improve operator focus, and support faster, more consistent workflows.

Key Features

- Projects visual picking instructions directly at the workstation
- Keeps key information close to the operator's work area
- Highlights the correct bin compartment
- Uses hand-in-compartment detection
- Provides red/green validation feedback
- Supports simple, repeatable, high-frequency picking workflows

Core Benefits

- Improves ergonomics by reducing unnecessary screen shifting
- Helps operators pick faster and more accurately
- Reduces wrong picks through guided confirmation
- Supports more consistent picking performance
- Helps new or less experienced operators work with more confidence
- Makes AutoStore workflows easier to use and scale

Kardex + AutoStore: Purpose-built to perform

Innovations that make AutoStore faster, smarter, and easier to operate

Kardex enhances AutoStore with a portfolio of proprietary innovations designed to improve performance across the full system lifecycle — from implementation and orchestration to picking, maintenance, cleaning, and inventory validation. Together, these solutions help reduce manual effort, improve accuracy, protect uptime, and unlock more value from every AutoStore system.

Kardex BinInductAI

Automatically verifies each bin before it enters the AutoStore grid to simplify bin induction and support faster deployment.

Kardex FulfillX - Warehouse Execution Software

Orchestrates robots, inventory, orders, and operators to optimize workflows, improve throughput, and support scalable system performance.

Kardex SensorCleaningStation

Automatically cleans robot track sensors to help maintain consistent performance, reduce manual maintenance, and protect system uptime.

Kardex SnapVac

Cleans grid during live operation to reduce manual maintenance effort and protect reliability.

Kardex PortScale

Uses real-time, weight-based validation to detect picking or quantity errors, support precise item counting, and reduce manual checking at the workstation.

Curious about how AutoStore can work for your business?

Calculate your ideal AutoStore system and ROI with StoreX; our quick assessment tool.

- Find out your system size, cost, and expected ROI.
- **Scan the QR-Code** to access the AutoStore cost calculator.
- **Bonus:** Compare different configurations to see what fits your needs best.
